* Unit count / year built per Dwellsy — not independently verified. Multi-address communities merged before averaging. House rule: comp properties under 5 units are excluded. Urban comp rules applied: vintage within 10 years of the subject; no 150+ unit complexes for a sub-100-unit subject; rent outliers pruned by standard deviation per bed type. Comp figures reflect listings from the last 6 months; the trending page uses the full lookback.

Comparable Rents by Unit Type

Property-weighted benchmarks; subject plans positioned against the comp median.

Subject Positioning & Rent Upside

Subject floor plans vs the comp set — the gap between in-place rent and comp-supported rent is the value-add story.

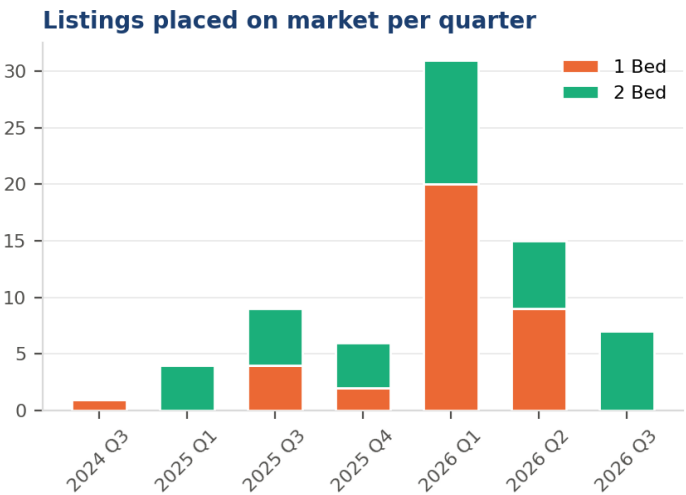

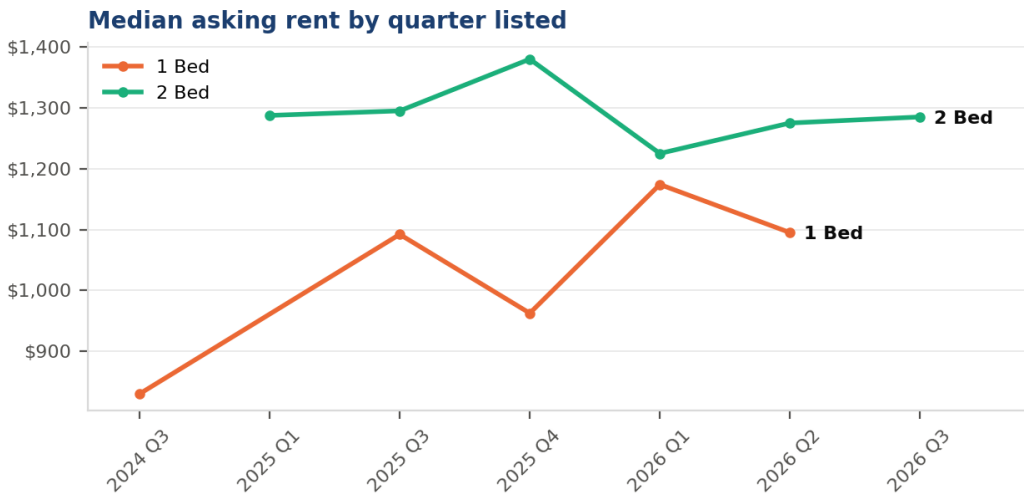

Floor Plan	Bed	SF	Units	Market Rent	In-Place Rent	Comp Median (same bed)	PSF-Implied Rent	In-Place vs Comp	Upside /Unit/Mo
1x1-600	1	600	14	\$932	\$852	\$1,095	\$1,032	78%	\$180

Total demonstrated upside									\$5,607/mo

Comp-supported target = the lesser of the same-bed property-weighted median and the PSF-implied rent for the plan's square footage (conservative). Upside floors at \$0.

Market Trending Behavior

Listing-derived trends across the comp properties — the comp pages use listings from the last 6 months; trends below use the full pulled lookback.

Unit Type	Prior Median (6-24 mo ago)	Recent Median (last 6 mo)	Movement	Recent Listings
1 Bed	\$1,045	\$1,149	+10.0%	27
2 Bed	\$1,310	\$1,265	-3.4%	21

Trend medians are computed from the quarter each comp listing was placed on market (asking rents). Thin quarters reflect small-market listing volume — read direction, not precision. Data: Dwellsy Comps API; property identities verified via public listing sites.
